

you'll see a little yellow balloon that says "You have files waiting to be written to the CD"

when you are ready to write your files all to the CD, click on the balloon and you will get another window and you click on the option, 'write these files to CD'.then you will get the CD wizard and

at this point you can change the name, put a CD in and press Next. That's all, then it will copy and the wizard will give you a chance to click finish.
